

# VitroStash IVF Storage System

**DOUBLE YOUR IVF STORAGE SPACE  
WITHOUT CHANGING ANYTHING IN YOUR LAB**

- A dewar retrofit with Vitrostash will cost about half of a new dewar
- Enhanced grid configuration allows for simple, ergonomic storage
- Fewer dewars further reduces energy and LN<sub>2</sub> costs
- CSD-47/127 for complete Vitrostash System
- Will fit both Chart MVE and Taylor-Wharton dewars
- Hooks & Handles configured to provide access to lower canister samples without needing to remove upper canister – no compromise of temperature to unrequired samples
- Canisters designed to hold small volume of LN<sub>2</sub> when lifted from dewar – maintain temperature consistently, thus protecting all samples from ambient temperature
- Can be used with all Vitrification devices
- Closed canes prevent “floaters”

**DOUBLE  
YOUR  
DEWAR  
CAPACITY**
