

Fluorescence Microscopy Staining Kits

The Fluorescence Microscopy Staining Kits reduce background noise and provide higher contrast images with a DNA-specific fluorochrome for use with Halosperm[®], halosperm[®] G2 and halomax[®].

fluored[®]

fluogreen[®]

Brightfield Staining Kit

The Brightfield Staining Kit facilitates visualizing the results obtained using Halosperm[®], Halosperm[®] G2, Dyn-Halosperm[®] and Halomax[®] processed slides under the brightfield microscope.
