

Hunter Scientific CE Marked Pasteur Pipettes

Below are a range of unique features Hunter Pasteur Pipettes have which other Glass Pasteur pipette do not have.

A short video on the website shows some of the benefits. This can be viewed on the home page under Welcome to Hunter Scientific at www.hunterscientific.com

CE Marked Class IIa Medical Device

Hunter Pasteur Pipettes are CE Marked as Class IIa Medical Device products for IVF use. Other Pasteur pipettes are only registered as Class Is devices. Hunter Class IIa products are suitable for channelling or storing, body liquids or tissue, for the purpose of eventual introduction into the body such as IVF procedures. Class Is devices are not suitable for this purpose.

Unique Fire polished tips

All Hunter Pasteur pipettes have uniquely fire polished tips. No scratching of tubes, dishes, or damage to gametes.

Non-Cotton Plugs

All Hunter Pasteur pipettes use a special synthetic plug to avoid cotton fibre drop. Other Pasteur pipettes still have cotton plugs which can drop fibres down the Pasteur.

Sperm Motility Assay (SMA)

All Hunter Pasteur pipettes have a Sperm Motility Assay (SMA) – No other glass Pasteur manufacturer performs this additional assay.

Shelf Life

All Hunter Pasteur pipettes have a shelf life of 4 years – Other manufacturers have a shorter 2-year shelf life.

Tamper Evident Seal

All Hunter Pasteur pipette boxes have a tamper evident seal for added security.

Types of Glass

Hunter Pasteur Pipettes are available in both Borosilicate and Soda glass. Other manufacturers only offer borosilicate glass. Soda glass is a very good alternative to Borosilicate glass and is available at a lower price.

Superior Packaging

Hunter Pasteur pipettes benefit from superior primary & secondary packaging which ensures safe delivery worldwide. Our cardboard boxes are fully recyclable. We use minimum packaging to reduce waste. Packs of 5 ensure only very few pipettes are exposed at the same time once the packet is opened.

100% Inspection

Hunter Pasteur pipettes are 100% checked at each stage of manufacture to ensure consistent quality.

Sterile Pipette Bulbs

Hunter Scientific are the only company offering CE Marked individually packed, Sterile Pipette Bulbs to use with sterile Pasteur pipettes.
